CALL FOR PAPERS

The 5th Olympus International Conference on Supply Chains will be held in Katerini, Greece, on 24 – 26 May 2024, continuing a series of successful events traditionally organized by the Department of Supply Chain Management of the International Hellenic University. Logistics and supply chain management play a huge role within today's globalized economy, as they support the movement and flow of goods, together with many economic transactions. 5th Olympus ICSC is to offer an international platform for the presentation and publication of the latest scientific research findings in the field of Supply Chain Management covering a wide spectrum of new research findings in an interdisciplinary manner.

TOPICS

We strongly encourage contributions of papers targeting the conference scope, which includes but is not limited to the following topics:

- Digital supply networks
- Education and training practices on supply chains and logistics
- Green supply chain management
- Healthcare supply management
- Humanitarian logistics
- Industry 4.0 (Warehouse 4.0 and Transportation 4.0)
- Inventory management
- Material management
- Procurement and strategic sourcing
- Quality control and total quality management in supply chains
- Robotics automation
- Robot perception, cognition and action approaches for logistics tasks
- Autonomous transportations
- AI-methods for automated logistics tasks
- Supply chain finance
- Supply chain optimization
- Supply chain performance
- Supply chain risk
- Supply chain strategy
- Supply chains and logistics in the public sector
- Supply chains and logistics in the services sector
- Transportation and distribution management
- Value Chain Management
- Warehouse management
